### Clean Data Panel

#### Key Facts

- Fact:** Federal Reserve held rates at 5.25-5.50%
- Exact Statement:** "The Committee seeks to achieve maximum employment and inflation at the rate of 2 percent over the longer run"
- Number:** Target inflation rate remains 2.0%

#### Primary Sources

- Federal Reserve Official Statement
- FOMC Meeting Minutes
- Bureau of Economic Analysis

### Plain-Language Explanation

The [Federal Reserve](#) decided to keep [interest rates](#) unchanged, continuing their wait-and-see approach. This means borrowing costs for mortgages, car loans, and business loans will stay at current levels for now.

**What this means:** The Fed is balancing two goals - keeping [inflation](#) under control while not slowing down the economy too much. By holding rates steady, they're giving themselves time to see more data.

**For beginners:** Think of interest rates like a thermostat for the economy. The Fed raises rates to "cool down" an overheating economy, and lowers them to "warm up" a sluggish one. Right now, they're keeping the temperature steady.

### ⚠️ Uncertainty & Known Limitations

#### Data Limitations:

- Economic data is often revised weeks or months later
- Some indicators (like employment) have sampling errors
- Real-time data is limited; most metrics have a 1-2 week lag

#### What We Don't Know:

- Future policy decisions depend on incoming data
- Global events could change the outlook rapidly
- Fed officials may have differing views not reflected in statement

### ⚠️ Time Sensitivity:

This analysis is based on current conditions. Economic data changes rapidly, so verify with recent sources before acting.

#### AI Summary of Coverage

All four major outlets agree on the core facts: rates held at 5.25-5.50%, Fed watching inflation data, no immediate rate changes expected. Minor differences in emphasis:

- **Bloomberg** emphasizes Powell's personal commentary
- **Reuters** focuses on data-dependency framework
- **AP** highlights specific inflation cooling metrics
- **FT** stresses committee consensus and patience
